Our Red Leaf Barberry are 4-year transplants and they're really nice. The picture at right shows a 18/24" plant. Notice the well branched top and fibrous root system. A top quality plant that will transplant well. Our strain of Red Barberry is the best.

An order will reserve your needs for shipment whenever you say!

Our double white dogwood are grown exactly like the pink (at left). They have a distinctly double bloom just a bit later than the native white thus extending your dogwood season.

Single whites are grown from transplanted liners spaced in the row to form well developed specimens.

THE DOGWOOD LEGEND MAKES ITS APPEARANCE THIS SEASON OF THE YEAR

Now that dogwood planting time is here, the legend in connection with the Crucifixion is making the rounds.

At the time fcr the Crucifixion, goes the story, the dogwood tree was the size of all large forest trees, and because of its height and the strength of its wood, it was chosen for the timber of the cross. The tree was greatly distressed to be used for such a purpose, and Jesus, sensing its sorrow, smiled upon the tree and said to it:

"Because of your regret and pity for my suffering, I make you this promise—never again shall the dogwood tree grow large enough for a cross. Henceforth, it shall be shorter and bent and twisted and its blossoms shall be in the form of a cross—two long petals and two short petals, and in the center of the outer edge of each petal there will be nail prints, brown with rust and stained with blood. And in the center of the flower there will be an image of a crown of thorns and all who see it will remember that it was upon a dogwood tree I was crucified and this tree shall not be mutilated or destroyed, but cherished as a reminder of My death upon the cross."
